Change Log Firmware Version 2.2.0.6

Internal Test Version

Change Log Firmware Version 2.2.0.5

- **New:** Send states when ending scenes.
- **New:** "Single-Channel" luminaires for the app.

Change Log Firmware Version 2.2.0.4

- **Fixed:** ARTnet protocol is ignored.

Change Log Firmware Version 2.2.0.3

- **Fixed:** WLAN behavior with SR variant.

Change Log Firmware Version 2.2.0.2

- **Improvement:** KNX SR. Telegram transmission accelerated in slave mode

Change Log Firmware Version 2.2.0.1

- **New:** App support also for the EnOcean variant.

Change Log Firmware Version 2.2.0.0

- **New:** WLAN and WLAN standalone version.
- **New:** Linked scenes are supported.
- **New:** Potential free button triggers scenes.
- **Fixed:** Scenes are stopped reliably.

Change Log Firmware Version 2.1.1.0

- **New:** Editable multicast address.

Change Log Firmware Version 2.1.0.6

- **New:** DHCP - "Fall-Back" function.
- **New:** 1Bit object for DMX Slave added (<10% = "0", ≥10 = "1").
- **Improvement:** Error tolerance DMX Slave improved.

Change Log Firmware Version 2.1.0.5

- **Fixed:** DMX slave offset for DMX channels corrected.

Change Log Firmware Version 2.1.0.4

- **Fixed:** Channel "16, 32, 48, 64, 80, 96, 112, 128 ..." can be changed via 4Bit dimming.

Change Log Firmware Version 2.1.0.3

- **Improvement:** DMX output optimized.
- **Fixed:** Start behavior after upload corrected.

Change Log Firmware Version 2.1.0.2

- **Fixed:** Calculation of the index of objects for DMX Slave Out2 corrected.

Change Log Firmware Version 2.1.0.1

- **Fixed:** Adjustment of queue management due to operating system update.

Change Log Firmware Version 2.1.0.0

- **New:** DMX slave version
- **New:** Full KNX dimming actuators for each DMX channel added.

Change Log Firmware Version 2.0.2.0

- **Improvement:** KNX-TP telegrams are now reliably received.
- **Improvement:** Queue management.
- **Improvement:** Initialization if network connection is not available.

Change Log Firmware Version 2.0.1.1

- **Improvement:** Long intervals for pause and fading adapted.

Change Log Firmware Version 2.0.1.0

- **New:** Running scenes are not interrupted when changing DMX channels.

Change Log Firmware Version 2.0.0.2

- **Improvement:** Network interface parameters optimized.

Change Log Firmware Version 2.0.0.1

- **New:** Release of firmware version for DMX Configurator.
- **Improvement:** New data format for up to 512 changes within one step.

Change Log Firmware Version 1.0.0.3

- **Improvement:** KNX group address for several DMX channels.

Change Log Version 1.0.0.2

- **New:** Linked scenes.
- **Improvement:** DMX transmission interval shortened to 300ms.
- **Improvement:** Upload mechanism.

Change Log Firmware Version 1.0.0.1

Initial firmware version.
